

Sportsmobile CAMPER

Three feet shorter than most station wagons,
easy to drive and park — gets *25 miles per gallon.

Penthouse, Roof Carrier,
Roof Carrier Case and
Trim Stripes Optional.

...just the right size!

Sportsmobile + Volkswagen. It's a lovely combination. Sportsmobile's luxuriously comfortable interior blended with Volkswagen's superb wagon. The smooth operating sliding door gives you the feeling of walking in rather than folding yourself in half and sliding in. Plenty of leg room for spread out lounging. Sportsmobile's rear seat also locks in a lounge position for real relaxing as you watch the miles roll by.

*much more than a
conventional
automobile!*

On the road . . . off the back trails, Sportsmobile's interior has been conveniently planned for you and your family's enjoyment. Comfort is assured by years of progressive development. Solid construction using name brand materials minimizes maintenance. Sportsmobile — thousands of beautiful conversions since 1961.

*Based on 1976 EPA test average with manual transmission: 25 mpg highway; 15 mpg city.

Sportsmobile CAMPER

*it's all planned for
your enjoyment...
'round town or
cross country cruising.*

no "lean to" effect. 7' ceiling.

Wide Eaves — rain, sun protection.

Screened Windows — extra large, with
dual hinged privacy curtains.

Mattress bed — extends to 8'2".

Storage on top — full length, with tie
down brackets for light items.

Sportsmobile Camper Conversion includes a wonderfully comfortable rear seat with a two position back rest that permits you to lounge back, or sit upright. A soft bolster cushion serves as a comfortable arm rest or pillow.

Sportsmobile's Cabinet Module has been designed not only for beauty but for maximum function. The ice chest with its lift up lid permits convenient access, may be filled to the very top, and when open the cold air does not fall out like a side door icebox. Storage is conveniently provided with drawers and storage modules. A 5-gallon removable water con-

tainer may be filled in or away from the vehicle (right side door). The swivel table has infinite positions plus height adjustment. The table may also be swung over the top of the Cabinet Module if desired. When travelling the table and support arm should be safely stowed. Additional storage space is located in the super-large storage module between the closet and cabinet module (partially hidden by the swivel table), plus storage under the seat (carpeted), in the rear cabinet and a ceiling compartment.

Sportsmobile ...
It's all planned for your convenience — enjoyment.

Need more cargo space? Simply remove the Cabinet Module and leave it at home — on the patio or in the rec. room!

Need more storage? Add an optional Storage Cabinet. Removable from the vehicle in seconds. Aisle Compartment also available for added driving convenience.

A Super-Comfortable rear seat with a two position back rest is a Sportsmobile star attraction. Two inches of super-soft foam with quilted seat covers assure riding and sleeping comfort. The seat frame is all steel with springs for additional comfort and durability.

In seconds the bed swings out 8'5" spring loaded into a wonderfully comfortable bed. Enjoy an afternoon nap — or a restful night's sleep — anywhere, anytime! For added sleeping accommodations a cab hammock and penthouse top is available as options.

CAMPER

SLEEPS TWO — UPSTAIRS
ON A MATTRESS —
IN PRIVACY!

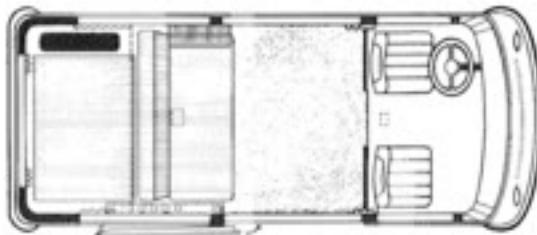

The Sportsmobile Penthouse will sleep two . . . upstairs . . . in privacy . . . on a comfortable mattress. Spring counter-balanced crossarms float the top up . . . or down in seconds. It's a wonderful option — just ask the kids. Bedboard extends to 6'2" to accommodate two adults. It's a little snug — but sleepable. Optional.

Sportsmobile — ADVENTURE • FAMILY FUN • INDEPENDENCE

Explore all sorts of roads and trails in all kinds of weather. The Sportsmobile can go places most campers back away from. Travel soft beaches, climb mountains and take 8" boulders in stride. The underbody is all steel. The rear axle is double-jointed to add more safety and stability to

the smooth ride you get from Volkswagen's 4-wheel independent torsion-bar suspension. It's only a little over a foot longer than the beetle — easy to maneuver in traffic — easy to park. And the best part is that you get over 25 beautiful miles per gallon!

Two additional Sportsmobile models to choose from...

SPORTSMOBILE CRUISER

For those who want a more basic conversion. The Cruiser is similar to the Sportsmobile Camper except a full width rear seat is included which eliminates the Camper closet/cabinet. The cabinet module with swivel table is also deleted; however, it may be ordered with the Cruiser as an option — as well as the two screened windows and 110 volt hookup. See "Cruiser" brochure for details.

SPORTSMOBILE CLUBCAR II

For a super luxurious interior, the Sportsmobile Clubcar II is a beauty — all its own! Standard equipment includes a swivel, recliner passenger seat; super comfortable rear seat with head rest (seat flips out into a bed); removable front seat with ice chest; beverage cabinet; upholstered rear cabinets; handsome pecan paneling and lots of luxurious soft shag carpeting.

WHY A SPORTSMOBILE? Unlike a conventional automobile, you can do more than just sit down and travel from one point to another. Unlike larger recreational type vehicles, you can use a Sportsmobile like a conventional car. Drive and park it with ease, it is no longer than a conventional automobile — three feet shorter than most station wagons. Drive it to work — to the store — to school — to grandma's . . . also drive it for a week-end outing — or cross country camping. And think of the restaurant and motel savings to boot! Good mpg, too.

INTERIOR STYLING — Everyone appreciates comfort and solid construction. Today's people also appreciate visual beauty and this is all part of Sportsmobile. The colors, patterns and textures are beautifully co-ordinated. Handsome seat fabrics and vinyls, quality curtain fabric, long wearing floor coverings, rich wood grain paneling and trim are all selected with care for visual harmony and beauty.

FINAL INSPECTION — Perhaps the most important facet in a reputable company's manufacturing program. Parts are naturally inspected during

manufacture. However, the most important inspection is the final one after the Volkswagen is converted. This is a detailed, thorough inspection, consistent with Volkswagen's extra high quality standards.

HOW TO ACQUIRE A SPORTSMOBILE — In some states, Sportsmobile converted Volkswagens can be ordered and financed through authorized Volkswagen dealers the same as a Volkswagen sedan. In other states, the acquisition of a Sportsmobile will not be as convenient because of the distance of Sportsmobile installation centers. In this case, it will be necessary to arrange through your dealer, or make arrangements yourself, to have a Volkswagen vehicle converted. Because of Sportsmobile's many additional features, superior finish and more attractive styling, it is not unusual to have customers drive considerable distances (as far as Mexico) for a Sportsmobile interior and/or expandable top. Conversions are made by appointment — only one day is required for a complete installation. Write for a current "Where To Buy — Installation Center" listing.

All specifications subject to change without notice.
